

Senior UI Designer

Munich

Your work will explore a wide range of design fields and you will be applying your knowledge and skills to a rich portfolio of projects, addressing diverse clients, composed of both renowned companies such as Honeywell, Samsung, and Bosch, as well as some of the most promising start-ups. We will welcome you in our international, multicultural and multidisciplinary team, constantly shaping both yours and our future towards the greatest it can be.

You will be

A Senior UI Designer in our Munich office, directly responsible to:

- Drive and support interdisciplinary communication between different design teams
- Effectively communicate all process stages to the client
- Build and grow customer relations
- Help to grow knowledge and expertise of user centred design methods and technical considerations within Pilotfish.
- Analyse and define user, market and technology requirements, while understanding the client's business and communication goals.
- Translate design requirements and user stories into meaningful, usable and appealing user interface design proposals for websites, apps and embedded interfaces
- Facilitate and take part in brainstorm sessions with industrial designers, developers, engineers and clients
- Present design concepts and lead design requirement discussions with clients
- Work out interaction design and visual design concepts as part of a project team or independently
- Create use cases, scenarios, persona's, flowcharts, wireframes, visual designs and interactive user interface mock-ups that include transitions and animations
- Prepare and execute user research and usability tests
- Plan and monitor projects, act as a contact person with the client
- Facilitating the transition from design to working code

You are

A creative and proactive Senior UI Designer with an eye for details and the passion to explore the boundaries of digital media and product design, and a passion to work in a multi-cultural English-speaking environment and in multi-disciplinary teams.

You have

- Excellent UI concept development, visual design and presentation skills
- Experience in common graphic programs such as Adobe Suite
- Experience designing for multiple platforms (Web, Android, iOS) and responsive
- Working knowledge or experience of technical/coding constraints of frontend development languages (html, css, js) to ensure implementable designs.
- Experience in embedded software projects and/or industrial design projects is a big plus.
- Experience in video editing is a plus
- An ability to work in multi-disciplinary teams with industrial designers and engineers
- At least 4 years of experience in user interface and new media design
- Experience in common wireframing & prototyping software such as Axure to build high and low fidelity interactive mock-ups
- Experience working with Lean and Agile manifesto, with rapid testing and improvement iterative cycles creative methodology and implementation

We are excited to receive your application!
